PROFESSIONAL SUMMARY

Motivated Information Technology undergraduate and aspiring Software Development Engineer with hands-on internship experience in web development, data-driven application development, and containerization (Docker). Skilled in building and supporting scalable, cloud-oriented software systems, with working knowledge of relational and NoSQL databases, SQL, Python, and Java. Experienced in Agile development environments, code quality practices, and cross-functional collaboration, with a proven ability to quickly learn new tools and technologies. Seeking a full-time Software Development Engineer role to contribute to reliable, high-availability data platform and software systems, including those supporting regulated, mission-critical products.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, Kotlin (Working Knowledge), SQL
- Data & Messaging Systems:** Kafka (Familiar), Message Queues & Brokers (Concepts), Event-Driven Architecture
- Databases:** MySQL (Relational Databases), Cassandra & NoSQL Database Concepts, Query Writing
- Frontend Development:** HTML5, CSS3, JavaScript (Basics), Responsive Web Design
- Backend & Tools:** Docker (Containerization), Git (Version Control), Wagtail CMS (Django-based)
- Software Practices:** Agile Methodology, Code Review Best Practices, Software Testing, Design & Documentation
- Soft Skills:** Team Leadership, Problem Solving, Communication, Time Management

INTERNSHIP EXPERIENCE

Askan Technologies – Internship Jun 2026 - Jul 2026 | 2 mos | Puducherry | On-site

- Worked as an AI/ML Intern, gaining hands-on experience in Artificial Intelligence and Machine Learning concepts through practical learning and real-world tasks.
- Enhanced proficiency in Python, data preprocessing, model development, and problem-solving techniques.
- Explored machine learning algorithms and their applications in solving business problems.
- Collaborated with mentors to understand industry best practices and improve technical skills.
- Participated in project-based learning, focusing on data analysis, model evaluation, and optimization.
- Strengthened analytical thinking, teamwork, and professional skills while working in a professional environment.
- Gained exposure to the complete machine learning workflow, from data preparation to model implementation.
- Successfully completed the one-month internship with a strong foundation in AI/ML and a commitment to continuous learning and professional growth.

Web Development Intern | French Institute of Pondicherry (IFP) – Weather Forecasting Division Nov 2025 - Dec 2025 | 2 mos | Puducherry, India | On-site

- Worked on web development tasks for a weather forecasting platform, contributing to front-end and back-end feature development.
- Used Wagtail CMS (Django-based) for content management and dynamic web page development.

- Containerized application components using Docker, improving deployment consistency and environment management.
- Collaborated with the development team to understand real-world software workflows and agile practices.
- Gained exposure to data-driven web applications and meteorological data presentation.

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology

University College of Engineering, Villupuram

CGPA: 8.7

2023 - 2027

PROJECTS

AI Guardian – Enterprise GenAI Security & Policy Monitoring System

- Developed an AI-powered security system to monitor and evaluate enterprise user requests against company policies.
- Implemented Prompt Injection Detection to identify jailbreaks, instruction overrides, policy bypass attempts, and privilege escalation attacks.
- Built a RAG-based semantic policy retrieval module using Sentence Transformers for context-aware policy matching.
- Integrated Qwen 2.5 (7B) via Ollama for local LLM-based risk assessment and decision-making.
- Implemented deterministic security rules for PII, credentials, confidential financial data, and sensitive customer information.
- Added risk scoring, ALLOW/BLOCK/HUMAN REVIEW decisions, audit logging, role-based access, and automated security testing.

ACHIEVEMENTS & CERTIFICATIONS

- Won cash prize at Symposium Paper Presentation – demonstrated technical knowledge and presentation skills.
- Earned multiple certificates from symposiums, workshops, and academic technical events.
- Completed UI/UX Design academic project and received recognition for design quality and innovation.
- Actively learning Python and Java through structured coursework and self-driven projects.
- Completed Docker & Wagtail CMS hands-on training during internship at French Institute of Pondicherry.
